CHAPTER – 1

Introduction

1.0 THE LANGUAGES SELECTED FOR THE STUDY

The Naga group of languages selected for the study were Ao, Chang, Chokri, Khezha, Konyak, Lotha, Rengma, Sangtam, Sema (Sümi) and Zeme. Tenyidie (Angami) two dialects of Angami (Tenyidie) namely Khonoma and Viswema have also been included in this study. Mokokchung District is the home district of Ao tribe. The Chungli language is the common language spoken by Ao Tribe of Naga. Tuensang district in Nagaland is the home district of Chang tribe. The language spoken by Chang tribe is known as Chang language and its common language. Konyak tribe live in Mon District in Nagaland. They have variety of mother tongues but they have one common language, known as Konyak language. Wokha District is the home district of Lotha tribe, the common language is called Lotha language. Sangtams tribes are living in Twensang District and Kiphire District. The common language of Sangtam tribe is Sangtam language. Sema tribes of Naga are live in Zunhebot District, Dimapur District and Kiphire District, Though they have different dialects they have one common language which is called Sema language. Tenyimia is comprises of different tribes and different dialects. But Tenyidie is the common language of Tenyimia. Khonoma and Viswema of Tenyimia village fall under Kohima District, Chokri and Khezha of Chakhesang falls under Phek District. Tseminyu District (recently created) in Nagaland and Phentsero in Assam is the home district of Rengma tribe. Rengma have three dialects and the selected language is Nzonkhwe. Zeliang tribes live in Peren District in Nagaland, Dima Hasoa of Assam state and some part of Manipur state in India. Zeliang have variety of dialects, but Zeme language is selected for this thesis.

1.1 METHODOLOGY

The data has been collected from two sources i.e. Primary source and secondary source. Primary data was collected through personal interview from native speakers of selected tribes. The informants were most trusted person and those who are keen to developed their literature. Some are Retired Govt. officers, some are church leaders, some are well educated Govt. Officers and some are social workers. For all the

languages secondary source of data is the Holy Bible, as the standard variety is used. The data collected is of the standard variety of each language.

1.2 DOCUMENTATION

For documentation, the transcription used is broad using the IPA symbols. The data is presented in the following format:

Line 1: Orthographic representation of the language.

Line 2: Phonetic transcription using the IPA symbol.

Line 3: Gloss following the Leipzig Glossing Rules.

Line 4: English translation.

1.3 AIMS AND OBJECTIVES

The aim of this study is to give a descriptive account of Interrogatives and Negatives in some select languages of Nagaland. Linguistic study and research have been carried out in Naga languages. Though research in this area is vast and important. 12 Naga languages have been selected for the study: Ao, Chang, Chokri, Khezha, Konyak, Lotha, Rengma, Sangtam, Sema (Sümi) and Zeme. Tenyidie (Angami) two dialects of Angami (Tenyidie) namely Khonoma and Viswema have also been included in this study.

1.4 INTRODUCTION OF Wh-QUESTIONS

According to the Webster dictionary, the meaning of interrogative is – a word (such as who, what, which) or a particle (such as Latine *-ne*) used in asking questions, the form that a phrase or sentence has when it is asking a question.

Andrew Radford says that, “Wh-questions, by contrast, are so-called because (in English) they typically involve the use of an interrogative word beginning with wh- (e.g. why, what, when, where, which- but note that how is also classified as a wh-word because it exhibits the same syntactic behaviour as other members of this class). In wh-questions, the speaker is requesting information about the identity of some entity in the sentence”.(Radford, 1988: 462-463).

The meaning of 'interrogative' therefore involves either information seeking question or confirmation seeking question. Therefore, the data collected has been divided into same manner of wh-question or information seeking question and confirmation seeking question.

1.5 INTRODUCTION AND DISTRIBUTION OF NEGATIVE

According to the Oxford Dictionary the meaning of negative is “absence or opposite of something positive, act of denying.” Negative is a form of affirmation by denial. Recent modern linguists have shared their research works to distinguish negation on different languages. Bhatia 1995:3 “Negation in South Asian Languages” mentioned “Klima (1965) distinguishes between “negative” words such as *not*, *none*, *never* and negative prefixes, such as *in-*, *dis-*, *un-* in English. He analyzes sentences with superficially quite distinct negative words such as *not*, *none*, *never* with a single underlying deep structure in the S. In SA languages, the neg particles such as *nahi*, *mat(H)*, *nai(P)*, *na(N)* etc., are used for **sentential negation**. The negative words with prefixes such as *-a*, *an-be* (H) etc., constitute **affixed negation**.” Among the Naga languages some are sentence or particle negation and some are affix negation. The Naga languages have both sentenced or particle and affixed negation. Some languages such as Chang, Chokri, Khezha, Khonoma, Rengma, Sema, Viswema and Zeliang are sentence or particle negative. Negative of finite verb is done by prefixing with the verb e.g (achir 'eat' – machir 'not eat'). The language such as Chang, Konyak, Lotha and Sangtam are affix negation. Bhatia 1995:22 says, “In the post-verbal NEG languages, only Kannada has fixed post-verb NEG position”. The negative in Naga languages are post-verbal and the position is fixed. The Naga languages belong to Tibeto-Burman language family and fall under SOV language. So all the negative particles follow the verb and are post verbal. The Naga languages under study exhibit prefixed and infix negative marker.

1.6 STRUCTURE

The dissertation has been divided into 6 chapters. Chapter 1 provides a brief background of the languages under study and an introduction to the research. Chapter 2 gives a survey of literature review. Chapter 3 gives the details of Wh-questions or information seeking questions and morphological distribution of question words. In chapter 4 we find the different forms of confirmation seeking questions. chapter 5 gives the details of negative and negative at word level and chapter 6 gives the findings and conclusion.

CHAPTER – 2

Literature Review

2.0 INTRODUCTION

This chapter provides a brief review of literature which is relevant to the study of Interrogative and Negative under the area of research. The literature reviewed are Transformational Grammar A first course – Andrew Radford (1988); Angami Grammar – P.P. Giridhar (1980); Negation in South Asian Languages – Tej K. Bhatia (1995); Bavarian working papers in linguistics 5 – Andreas Hölzl (2016).

2.1 TRANSFORMATIONAL GRAMMAR - ANDREW RADFORD (1988)

Radford (1988, 462 – 466) discusses the different types and usages of Questions. He says that, One major typological division of question, is between *yes-no questions* and *wh-questions*. According to Radford *Yes-no* questions are so called because they permit 'Yes' or 'No' are the most appropriate replies, the example are shown in the following conversation below:

- (1) SPEAKER A: Are you going out tonight?
SPEAKER B: Yes/No

The above example shows that, speaker B does not have any other appropriate word to reply the speaker A, but at least he has the option of answering 'Yes' or 'No'. Radford also discusses the meaning of *wh-questions*. He says that, *Wh-questions* are so-called because they typically use the word beginning with *wh-* (e.g. *why, what, when, where, which* – but note that *how* is also classified as a *wh-word* because it exhibits the same syntactic behaviour as other member of this class). In *wh-questions*, the speaker is seeking information about the identity of some entity in the sentence for which Radford gives an example with the word *wh-question 'who'* *who-questions* ask information about the identity of a particular person, and a suitable reply would be a word, phrase, or sentence containing the requisite information:

Example:

- (2) SPEAKER A: Who won the big fight?
SPEAKER B: The Boston Bruiser

At the same time, question word *why* is used to ask about reason or causes, a question word *where* is used to ask about the specification of a place, and so on.

Radford also discusses the second typological division of questions is that between *echo questions* and *nonecho questions*. Echo questions are when one person echoes the speech of another for seeking the confirmation, as shown in the following example:

- (3) SPEAKER A: I bought a car
SPEAKER B: You bought a car?

He also discuss *ṣī* marks as the Interrogative in questions with pronouns.

कहाँ मैं जाऊँ? (Where am I going?)
 मैं कौन हूँ? (Who am I?)

Giridhar also discuss Yes-or-No question, the question particles are *mē*, *m̄bê*, or *m̄bê*, *mô* or *mô* and *lê*. He mentions both *mē* and *mo* are information-seeking question particles. The question particle *mo* is used when the answer is doubted or expected or desired or assumed to be positive, but *mē* is used in matter-of-fact information-seeking with no such doubting or assumption. Examples are given bellow:

क्या आपने कुछ भी सुना है?	'Did (you) have heard anything?'
क्या आपने कुछ भी कहा है?	'Have you said anything?'
क्या आपके पास कोई किताब है?	'Is there any letter for me?'
क्या आपने हिन्दी सीखी है?	'Did you know English?'
क्या वह आपके साथ है?	'Are you well?'; 'How are you?'
क्या आप कुछ भी दे सकते हैं?	'Can you give some money?'

Giridhar also discuss question particle *lê* is an information-confirming interrogative particle. For example,

वो तो आएँगा लें? 'he¹ will³ come², Won't he?'

Here the speaker has heard from someone about his coming and just want to confirm it.

Giridhar discuss another kind of yes-or-no question, the interrogative particles such as *gā* or *ṣī* are preceded immediately by the negative marker twice. He explains that this is the only situation where *gā* and *ṣī* can occurs in the sentence without any interrogative pronoun. Examples are given bellow:

क्या आपने कुछ भी नहीं सुना है?	'Did you hear anything?'
क्या आपने कुछ भी नहीं कहा है?	'Did you say anything?'

Giridhar discuss question particle *m̄bê* or *mbe* is also an information-seeking interrogative particle like *mē*.

क्या वह आपके साथ है?	'Did you go?'
क्या वह आपके साथ है?	'Did you go?'
क्या वह आपके साथ है?	'Did you go?'
क्या वह आपके साथ है?	'Did you go?'

He also discusses *ṅdiê* which is a free form occurring in the discourse-final position and used as a response-elicitor, which is equivalent to the English tag question 'so'? Examples are given bellow:

<i>hàá' íshàhíé'</i>	'Don't eat this'
<i>hàá' íshàhíéíé'</i>	
<i>nhicòmáyo' pèbráhíé'</i>	'Don't make the baby cry'
<i>nhicòmáyo' pèbráhíéíé'</i>	
<i>á' kábváké'</i>	'Don't trouble me'
<i>hí nù' vóhíé'</i>	'Don't go home'
<i>hí nù' vóhíéíé'</i>	
<i>hí nù' vóhíéíé'</i>	'Please don't go home'
<i>puó hù' vóhíéíé'</i>	'Let him not come'
<i>kàhíú bí' íshàhíéíé'</i>	'Let the rope not break'
<i>úhà hù' vóhíéíé'</i>	'Let them (pl.) not go'
<i>puó hù' míkàsháíé'</i>	'Don't let him eat'
<i>nhá' vóhíé' ká'</i>	'Let us (incl. pl.) not go'
<i>áwí' zàtáhíé' ká'</i>	'Let us (incl. du.) not sleep'
<i>(3) ùkàhíkúórí' zé' á' fà' suó'</i>	'One should sleep early'
<i>Puó' vóhíéíé'</i>	'He shouldn't come'
<i>(4) á' ínglís' ùh' hékàngá'</i>	'I cannot write English'
<i>máwúó' hánú' rí' hékàngá'</i>	'None can come here'
<i>puó' wáá' íhí' hékàngá'</i>	'She cannot sing'
<i>(5) ché' ví' mó'</i>	'(The) road is not good'
<i>á' s' mó'</i>	'I don't know'
<i>úhó' mázíéé' ísáyá' mó'</i>	'We (incl. pl.) don't eat venison'
<i>puó' ví' mó'</i>	'She has not come'
<i>á' zé' mó' zó'</i>	'I did not sleep at all'
<i>má' ví' bá' mó' há'</i>	'Nia is not well'
<i>hákó' máyíé' mó'</i>	'Rice is not cheap'

Giridhar discuss *mo* is a matter of fact, flat negativizer and *m̀bé* is another negative marker with less flat and matter-of-fact and more polite.

Example: in answer to the question 'Has he come?'

hàá' áwí' pú' zé' wóhíé' pú' 'No, but he will come soon'

Another example in answer to a piece of advice to follow a certain course of action,

hàá' áwí' zé' hán' wá' hán' 'No, but I want to do that'

2.3 NEGATION IN SOUTH ASIAN LANGUAGES – TEJ K. BHATIA (1995)

Bhatia (1995: 11 – 23) discusses the Negative Particles in South Asian Languages. He expresses sentential negative in Hindi by three negative particles *nahī*, *na*, *mat*. He compared the negative particle of Hindi *nahī* with English *not* which is the most frequent negativizer. The sentential negation particles in Hindi examples are given below:

Hindi *mat* non-honorific imperative
na Subjunctive, Honorific, Imperative, Conditional (Past & Subjunctive),
 participial and gerundive phrases
nahī elsewhere

Bhatia also presents the distribution of NEG particles in Hindi as given below:

Hindi *mat* tū mat jā
 you NEG go
 Do not go.

na kyā vo na jāe?
 Q he NEG go (Subjunctive)
 May he not go?

uskā na jānā acchā he.
 his NEG going good is
 It is good for him not to go.

nahī vo nahī jāegā
 he NEG go – will
 He won't go.

Bhatia also mentions that the surface distribution of negative particles in Indic languages is semantically and not morphologically governed. He illustrates in Hindi language that, the negative particle *mat* is used in non-polite imperative as shown in the example:

tum vaha mat jānā (H)
 you there NEG go (Imperative)
 You don't go there.

2.4 BAVARIAN WORKING PAPERS IN LINGUISTICS 5 – ANDREAS HÖLZL (2016)

Hölzl (2016: 17-28) says that, a typology of questions should acknowledge all the

different types of questions. Therefore, he focuses not only on polar question (PQ) and content question (CQ) but also focus on alternative questions (AQ), focus questions (FQ) and tag questions (TQ). For that Hölzl takes the English examples corresponding to the declarative sentence *I want coffee*:

English

- a) *Do you want coffee?* (PQ)
- b) *Do you want coffee?* (FQ)
- c) *Do you want coffee or tea?* (AQ)
- d) *You want coffee, right?* (TQ)
- e) *What do you want (to drink)?* (CQ)

The underlined indicates intonational focus. Hölzl says that there might be additional categories but strongly comments that the above five types are the most central ones from a cross-linguistic perspective. He gives an examples from the Japonic language Yuwan below:

Yuwan (Japonic; niinaga 2010: 76f.)

- a) *kuri=ba* *tu-ju-mi?*
 this=ACC take-IPFV-Q
 'Will (you) take this?' (PQ)
- b) *kuri=ba=du* *tu-jur-ui?*
 this=ACC=FOC take-IPFV-Q
 'Will (you) take this?' (FQ)
- c) *nuu=ba=ga* *tu-jur-u?*
 what=ACC=FOC take-IPFV-Q
 'what will (you) take?' (CQ)

The above examples shows that Yuwan has special question suffixes for polar (-*mi*), focus (-*ui*), and content questions (-*u*). Both focus and content questions have addition of (=du) and (=ga) a narrow sentence focus. And an interrogative can only be encountered in content questions (*nuu* 'what'). Not always but alternative questions are closely related to focus questions.

Chapter – 3

Interrogative : Wh-question

3.1. Interrogative – Wh-questions of Ao Language:

3.1.1 INTRODUCTION :

In Nagaland, Mokokchung District is the home district of Ao tribe. According to 2011 census the district has 119 government recognised villages with a total number of 194,622 populations. Ao tribe has three spoken varieties i.e. Changki, Mongsen and Chungli. Chungli language is the common variety. Majority of the Aos understand Chungli language but few cannot speak Chungli language, because they belong to the remote village of Mongsen spoken villages. The data for Ao has been collected from a Chungli speaker.

3.1.1.1 kechi /kətʃi/ : 'what' is used for asking the materials or any other objects.

1. kichiba adena **kechi** ait?
kitʃibə̀ ədenə̀ kətʃi ət
 window through what came
 'What came in through the window?'

Ans. kichiba adena **ozü** ait
kitʃibə̀ ədenə̀ ōzə ət
 window through bird came
 'The bird came in through the window.'

2. nai **kechi** angu?
nə̀ kətʃi əŋu
 you what see
 'What did you see?'

Ans. ni **ozü** ka angu
ní ōzə̀ khə̀ əŋu
 I bird one saw
 'I saw a bird.'

3.1.1.2 komala /kūmlāl/ : 'what type' is used for asking the different types of a person.

3. pa ya **komala** nisung?
 pāl jāl kūmlāl nisōḡ
 he CASE what type person
 'What type of a person is he?'

Ans. Pa ya nisung tajung
 pāl jāl nisōḡ tādḡōḡ
 he CASE person good
 'He is a good person.'

4. nai **komala** sūngjianglijang sapur
 nāl kūmlāl sōḡḡiāḡlidḡāḡ sapur
 you what type fruits like
 'What type of fruits do you like?'

3.1.1.3 kong /kūḡ/ : 'where' is used for asking a specific location.

5. na **kong** alir?
 nāl kūḡ līā
 you where live
 'Where do you live?'

Ans. ni **Kohima** nung alir
 nāl kōhimāl nūḡ līā
 I kohima in live
 'I live in Kohima.'

3.1.1.4 kodang /kūdāl/ : 'when' is used for asking specific date and time (past, present and future).

6. na kidangi **kodang** aor?
 nāl kīdāḡi kūdāl lāwā
 you to home when going
 'When are you going home?'
 Or na **kodang** kidangi aor? (possible)

Ans. ni **asem ako** nung kidangi aor
 nāl āsēm ākō nōḡ kīdāḡi lāwā
 I three o'clock at home going
 'I am going home at 3 o'clock.'

3.1.1.5 kechiba /kətʃibəl/ : 'why' is used for asking reason.

7. na **kechiba** delhi-i aor?
 nà kətʃibəl delhi- i āwə́ɪ
 you why delhi to going
 'Why are you going to Delhi?'
 na delhi-i **kechiba** aor? (possible)

Ans. ni delhi-i **tazüngi** aor
 nì delhi-i tázəŋi āwə́ɪ
 I delhi-to to study going
 'I am going to Delhi for my study.'

3.1.1.6 shiba /ʃibəl/ : 'who' is used for asking name of a person (human, singular, male, female).

8. na tenüŋ **shiba**?
 nā tənəŋ ʃibəl?
 you name who
 'What is your name?'
 * na tenüŋ **kechi**
 nā tənəŋ ʃibəl?
 you name what
 'what is your name'. (not acceptable)

Ans. kü tenüŋ **John**
 ká tənəŋ dʒɔ́n
 my name John
 'My name is John.'

9. la ya **shiba**?
 lā jā ʃibəl?
 she CASE who
 'Who is she?'

Ans. la ya **mary**
 lā jā mɛ́ɪ
 she CASE mary
 'She is Mary.'

3.1.1.7 *shirnok /ʃiːnoʔ/*: 'who' is used for asking persons in many (human, plural).

10. **shirnok** aru
ʃiːnoʔ ʔliː
 who came
 'who came.'

Ans. **yimdaklir** aru
jɪmɔkɫiː ʔliː
 villagers came
 'the villagers came.'

3.1.1.8 *koma /kɪmɔʔ/*: 'how' is used for asking health condition.

11. na **koma** lir?
nɔ kɪmɔʔ liː
 you how have
 'How are you?'

Ans. ni **junga** lir
ni ʔʒuŋɔ liː
 I fine have
 'I am fine.'

3.1.1.9 *koda /kɔdɔʔ/*: 'how' is used for asking the manner of activity.

12. nai ya **koda** yanglu?
nɔ jɔ kɔdɔʔ jɔŋlɔʔ
 you this how make
 'How did you make this?'

Ans. **kü medemer teyari ajanga** ni ya yanglu
kɔ mɔdɔmɔ tɪjɔliː ʔiʃɔŋɔ ni jɔ jɔŋlɔʔ
 my friend help through I this make
 'I made this with the help of my friend.'
 ni ya **kü medemer teyari ajanga** yanglu. (possible)

3.1.1.10 *kwika /kwɪ:kɔʔ/*: 'how much' is used for asking the number or the amount of price.

13. na **kwika** angu?
nɔ kwɪ:kɔʔ ʔŋɔ
 you how much get
 'How much did you get?'

Ans. ni **ana** angu
ni ʔnɔ ʔŋɔ
 I two got
 'I've got two.'

3.1.1.11 kodaka /kúɖáɓá/: 'how much' is used for asking the amount of quantity.

14. na **kodaka** angu?
 ná kúɖáɓá áhù
 you how much get
 'How much did you get?'

Ans. ni **padaka** ya angu
 ní páɖáɓá já áhù
 I much this got
 'I've got this much.'

3.1.1.12 kopiga /kúpiká/: 'how far' is used for asking information of distance or duration.

15. library - ji **kopika**
 líbá.áá - tʃí kúpiká
 library DET how far
 'How far is the library?'

Ans: líbráɪɹɪ - jí idak nungi talangka **masü**
 líbá.áá - tʃí íɖák nūhí táláɓká mäsə
 library DET here from far not
 'The library is not very far from here'

3.1.1.13 kwiben /kwíɓán/: 'how many times' is used for asking number of times.

16. nai laishiba **kwiben** züngdang?
 náí líʃíɓá kwíɓán zəŋɖáŋə
 you bible how many times read
 'How many times have you read the Bible?'

Ans: ni laishiba **anaben** züngogo
 ní líʃíɓá áhápán zəŋɔgə
 I bible two time read

NEGATIVE

5.1 INTRODUCTION

Negative is a form of affirmation by denial. It is done by affixing the allomorphs of the morpheme, by prefixing of finite verb (ying : drink – yeying : not drink), and negative at word level.

Typology of negative markers:

Payne 1985:162 “Typologically, negative markers in Tibeto-Burman languages may be classified into three types namely

- i. Morphological type (affixes)
 - ii. Negative particle
 - iii. Negative verb (negative copula)”
- i. Morphological type (affixes): Some Naga languages belong to the morphological type such as Ao language, Chang language, Konyak language, Lotha language, and Sangtam language.
 - ii. Negative particle : The Naga languages of Tenyidie, Viswema, Chokri, Khezha, Khonoma, Rengma and Zeliang (falls under Tenyimia), Chang and Sema exhibit negative particle.
 - iii. Negative verb (negative copula): “Tibeto-Burman languages have negative verbs meaning 'be not', 'not have', 'not exist' etc. to negate the existential/ locative/ possessive constructions. The negative verbs in Tibeto-Burman languages tend to occur in the final position of clause or sentence.” The Naga languages do not fall under this type -

CHAPTER - 6

FINDINGS AND CONCLUSION

Below given figure 2 shows the Tenyimia group of languages. Two dialects from Angami tribe i.e Khonoma from Western Angami and Viswema from Southern Angami, Kikruma (Chokri) and Khezhakeno (Khezha) from Chakhesang tribe, Tesophenyu from upper (Noerthern) Rengma tribe and Heningkunglwa and Benreu from Zeme tribe, have been selected.

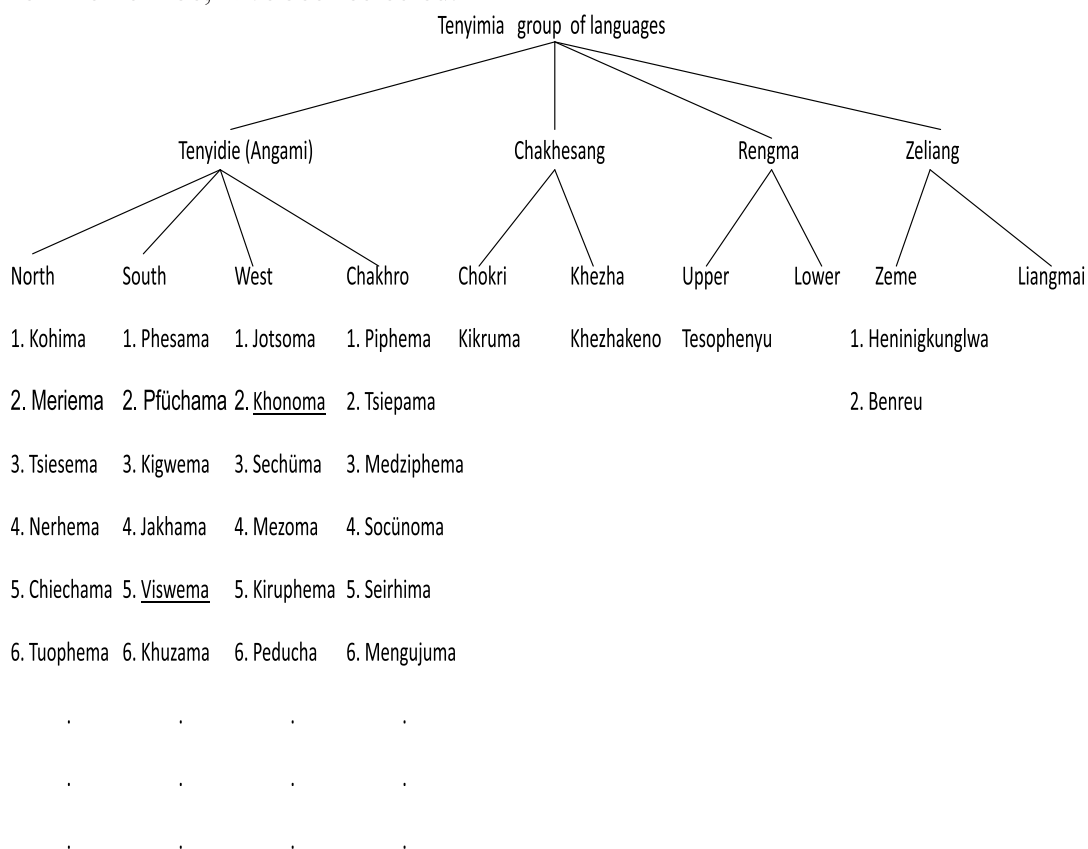

Figure 2 :The Tenyimia group

Interrogative words of the Naga languages vary from one another, some languages have question words but no question marker, and some languages have both question words as well as question markers. Some languages e.g Konyak and Sangtam exhibit syncretism in the usage of question words. Example is given below:

Konyak language :

1. nangte **hangke** minpu **shi**?
nangte hangke minpu fi
 you what name QMKR
 'What is your name?'

2. nang **hangke** ngohnang **shi**
naŋ haŋke ŋoŋnaŋ si
 you how have QMKR
 'How are you?'

Rengma language:

3. no amighi **kaju** ajen whaten **nu**
no amighi kaɟu aɟen wɬaten nu
 you o'clock when home going QMKR
 'When are you going home?' (time)
4. no apen **kaju** moya **nu**
no apen kaɟu moja nu
 you pieces how much got QMKR
 'How much did you get?' (number)

All the languages under study exhibit the insitu position of the wh-question word with no word-order flexibility in their occurrence. However, Ao language and Chang language permit word-order flexibility in the occurrence of wh-question word. For example

Ao language:

5. na kidangi **kodang** aor?
na kiɬaŋi koɬaŋ aor?
 you to home when going
 'When are you going home?'
- also na **kodang** kidangi aor? (possible)

Chang language:

6. waiyet ka **ai** lotkei
waijet ka ai lotkai
 window through what came
 'What came in through the window?'
- also **ai** waiyet ka lotkai (possible)

Table 6.4: Comparison of negative word in the Naga languages

The present study is purely a descriptive and comparative work. Collection of data and information was done through primary and secondary sources. The primary data has been collected from the native speakers and the secondary data has been collected from the respective tribes Holy Bible and some written books. Other source of the informations like number of villages, number of populations, map of Nagaland etc were collected from the internet. Very less research works have been done on the topic of interrogative and negation on the Naga languages till date. The topic of research has proved to be an interesting one as it has unearthed various words of different native languages which were intentionally or unintentionally overlooked or neglected by the present generation speakers.
